More Defenshield MDFP's on their way to support US Marines in Iraq

Camp Fallujah, Iraq, September 11, 2006 – In a contract award valued in excess of \$1.3M, I Marine Expeditionary Force this morning requested additional DS-192 MDFP's to support operations in Iraq. This award brings the total of MDFP's protecting and saving the lives of US and Iraqi security forces deployed in Iraq to over 400 units. Deliveries will begin in November and include the ATV mobility option developed especially for use on unimproved and rough surfaces.

The Defenshield MDFP units offer a level of protection that maximizes deterrence and minimizes the chances of attack in terrorist-prone regions of the world. Units are currently deployed at entry control points in various cities in Iraq, especially in the Green Zone. These partitions, similar to other Defenshield units deployed by the Pentagon Force Protection Agency, Department of Justice, Department of Homeland Security, the Department of Defense and private sector infrastructure facilities provide the highest level of protection in a mobile, stand-alone device.

"The more effectively our troops are protected, the faster they can complete their mission, stabilize Iraq and return home." said Collins White, President of Defenshield. "The security provided by the MDFP's allows our Soldiers and Marines to safely engage and defeat enemy forces."

The Defenshield product line is certified to NIJ Level III (assault rifles), NIJ Level IV (30-06 armor piercing), and is certified by the US State Department to Standard 01.01 for resistance to both 5.56mm and 7.62mm NATO rounds. Equipment is available through the GSA Schedule to all federal agencies and state, local, and municipal law enforcement under the Justice Department 1122 program. Funding is available through the DHS Homeland Security Grant Program (HSGP). The GSA Schedule also includes Defenshield's replacement glazing package for the Cadillac/Gage Peacekeeper armored vehicle in use by many law enforcement agencies.

Defenshield Inc. is a veteran-owned, New York corporation manufacturing bullet, blast and fragment resistant equipment for the government, military, law enforcement and the private sector for anti-terror, force protection and physical security requirements. The Defenshield product line offers the highest level of security, defeating armor-piercing weaponry, assault and sniper rifles, as well as handgun and shotgun rounds. Uses include hostage negotiations, personnel protection, and the immediate establishment of security checkpoints whenever and wherever a higher level of personal protection is necessary.
